EDUCATION

RD Engineering College	**2017 – 2021**
*B.Tech - Computer Science and Engineering - **CGPA - 7.77***	*Ghaziabad, Uttar Pradesh*

EXPERIENCE

SuveraFresh Pvt Ltd	**October 2024 - Present**
Software Engineer	*Kanpur, Uttar Pradesh*

- Manage front-end development for SuveraFresh app and website, contributing to core implementations.
- Implemented **Firebase Cloud Messaging**, for faster user engagement through **real-time notifications**.
- Integrated **JWT secure authentication** with Refresh and Access Tokens, to enhance application security.
- Designed and structured app navigation using **React Native Stack and Tab**.

Startxlabs Technologies ↗	**July 2021 - May 2022**
Frontend Developer	*Remote*

- Optimized website performance, reducing page load time, through efficient rendering and **code-splitting**.
- Applied Agile development practices using Jira, leading to faster sprint delivery and team coordination.
- Integrated **RESTful APIs** and collaborated with **backend developers** in Ed-Tech projects.
- Implemented **user authentication, search functionality** and a dynamic pages.
- Designed and developed reusable **React Native components**.
- **Key Technologies and Tools :** React.js, React Native, Redux, Material UI, React Hook Form, Github

PROJECTS

GetNow App - Order Online groceries and more ↗	**May 2025**

- GetNow brings your favourite local stores online groceries, food, medicines and more delivered in just few minutes. Implemented an order tracking flow, after placing an order, users are guided through real-time status updates from 'Preparing' to 'Out for Delivery', and finally to 'Delivered'.
- Managed all application state, including cart, order flow and UI transitions, efficiently using Redux Toolkit.
- **Technologies Used:** React Native, NativeWind, Redux Toolkit
- **Learning:** Implementation of real time status updates with Redux Toolkit.

SuveraFresh Web - Get Fresh Raw Food ↗	**Dec 2024**

- Developed a seamless and responsive ordering system using React.js for Suverafresh, enabling users to browse and purchase fresh raw food and seafood with guaranteed delivery within 45 minutes.
- Implemented JWT Secure Token Refresh and Access Token mechanism to enhance user authentication.
- **Technologies Used:** React.js, Redux Toolkit, Tailwind CSS.
- **Learning:** Exposure to error handling, JWT secure Token and API consumption in production level

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript
Technologies/Frameworks: Tailwind CSS, React.js, React Native, Redux Toolkit, NativeWind
Developer Tools: VS Code, IntelliJ, Github, Vercel, Firebase

ACHIEVEMENT

Maintains an active GitHub portfolio with real world projects demonstrating front-end skills in web and app.

EXTRACURRICULAR

Passionate about public speaking, engage in discussions to improve confidence and effective communication skills.
